

Axxon Smart 2.1.4 Release Notes

Main changes

Main changes in *Axxon Smart 2.1.4* are:

1. Product stability is improved during setting the recording to the archive.
2. Drivers Pack's latest version 3.2.4.

Configuring computers to run Axxon Smart

While installing the *Axxon Smart 2.1.4* one should remember that the following requirements are demanded of computer settings with this software:

Note! Requirements are caused by architectural features of NGP platform, on the basis of which the system is realized, and consequently it is not a fail in the software operation.

Requirements realization is performed in full by the user. Assistance in solving the problem concerning these requirements is not provided by AxxonSoft technical support service.

1. TCP ports, dynamically specified by OS, are used while connecting the server-client.
2. Synchronize the time among all the networked computers.
3. When using *NOD32* antivirus, it is strongly recommended to either disable the *Web Access Protection* service or add the IP addresses of IP devices to the list of exceptions for antivirus scans.
4. Enable remote access to the computer using NetBiosName.
5. Length of the computer NetBiosName cannot exceed 15 symbols.
6. Use only Latin characters, Arabic numerals and the minus sign ("-") to name your computer.
7. Never change the computer name after you have installed the system.
