

Axxon Next 3.5.1

Release Notes

13 February 2013: AxxonSoft releases version 3.5.1 of Axxon Next video management software

Learn more about Axxon Next on the product page at http://www.axxonsoft.com/products/axxon_next/

Fixes in Axxon Next 3.5.1

1. Connections to a domain that has a large configuration are now initiated more quickly, thanks to delayed loading. When the client component starts, the configuration is loaded only for the cameras that are included in the active layout. The configuration of the remaining cameras as well as the domain configuration are loaded in the background after the client has started.
2. Improvements made to handling of archives. A separate process is now created for each archive.
3. Support has been improved for archives created by old versions of Axxon Next and Axxon Smart.
4. Fixed errors related to saving a distributed configuration after restoration of the connection between servers in an Axxon domain.
5. Overall stability improvements for large distributed configurations.
6. Improved stability in case of sudden power failure when a configuration is being saved.
7. Reduced network footprint for multistream cameras.
8. Fixed possible errors related to product updates.
9. Fixed possible errors related to product installation.
10. Fixed possible error related to quitting the application.
11. Fixed errors in the web client.
12. Fixed and supplemented documentation for the product and for HTTP-API.

IP device support

The release includes Drivers Pack 3.2.21 for IP devices support. Detailed information about the Drivers Pack, where to find the latest set of drivers, and the list of supported hardware is available on the following page:

http://www.axxonsoft.com/integrated_security_solutions/supported_ip.php

Downloads and licensing

New in version 3.5.1: support for all information boards and satellite maps is included with free licenses.

The Axxon Next installer includes both the client and server components. The client can be installed on a computer together with the server, or installed on a separate dedicated client workstation. There is no limit on the total number of servers and clients in a system.

Axxon Next can be activated in one of three modes:

The free version supports 1 server, 16 cameras, 1 TB storage, and an unlimited number of clients.

Detailed information on the differences between the paid, trial, and free versions and the licensing guidelines can be found on the AxxonSoft website at
