

Intellect Web Report System 3.2

Release Notes

22.04.2016 AxxonSoft releases version 3.2 of Intellect Web Report System. This version is intended for use with version 4.10.0 of the Intellect PSIM.

New features and improvements

1. A new change protocol report – user actions audit - has been added.
2. Archive positioning in POS reports can now be edited.
3. Export to Excel in a general report by potential violations has been improved.
4. Face counter report has been improved.
5. Time for creating a protocol report and a report by users access levels has been reduced.
6. Titles can now be enabled/disabled on the video in Web Report System.

Fixes

1. Fixed error related to region sorting in a Presence in the workplace report.
2. Fixed error related to incorrect report export to Excel.
3. Fixed error related to duplicating the list of departments in a General report.
4. Fixed error related to object tree scrolling in a Protocol report.
5. Fixed error causing malfunction of reports auto-generated on the schedule after computer restart.
