

Intellect Detector Pack 2.0

Release Notes

28 February 2014 AxxonSoft releases version 2.0 of the Intellect Detector Pack collection of video detection tools. This version is intended for use with version 4.9.0 of the Intellect PSIM.

The full list of changes in version 2.0 is available [here](#).

New features and improvements

1. Now compatible with Intellect 4.9.0.
2. Documentation has been improved and supplemented.

Fixes

1. False People Counter detections caused by a large number of minor video artifacts have been fixed.
2. A number of minor errors have been fixed in the product and documentation. Product stability has been improved.

Important notice about update

To properly update from older versions, you should reapply the settings of Queue Length and People Counter Detectors after installing Intellect Detector Pack version 2.0. For this call the window for selecting surveillance area and click the OK button. After this click the Apply button in the detector settings.

For information about compatibility of Intellect Detector Pack with Intellect versions, refer [here](#).

For documentation, please visit the [product documentation portal](#).
