

Intellect Web Report System 3.1

Release Notes

10 November 2015 AxxonSoft releases version 3.1 of Intellect Web Report System. This version is intended for use with version 4.9.7 of the Intellect PSIM.

New features and improvements

1. Added new reports:
 - report by users access levels;
 - report by users of access levels and readers;
 - report by employee passes;
 - report by first and last card presenting per calendar day;
 - report by unidentified persons.
2. Added information about the number of detected events to the Protocol report.
3. Added the **Total** field to the Entering/Exiting people counter report.
4. Added a new **User defined 2** period. It allows selecting time periods in the following Auto Intellect reports: Traffic statistics by vehicles groups, Time slice on zone, Traffic statistics by vehicles types.
5. Added possibility to specify maximum of output strings in the Protocol report.
6. Added support of Windows 8.1, Windows Server 2012 and Windows 10.
7. Added Bulgarian localization of Web Report System.

Fixes

1. Fixed bug that caused displaying incorrect dates of reports.
2. Fixed bug that caused malfunction of the **Expanded** parameter in the settings of the Employee time clock report.
3. Fixed bug that caused auto-generated reports not to send on schedule or manually.
4. Fixed bug that caused email settings not to get saved while using IIS.
5. Fixed bug that caused report creation malfunction in Spanish localization of Windows.
