

Release notes

April 7, 2016 AxxonSoft releases version 6.0 of ACFA integration modules.

For information about the system and integrated equipment, refer [here](#).

New features

New interface module

- Access Manager.
This interface module is designed to replace the Visitor Management System module. It has more comfortable and modern interface and also has some additional features. Details on the new module can be found in the documentation.
The module is compatible with the Intellect software starting from version 4.10.0.

New module transferring messages from the Intellect to the Axxon Next software

The new module allows the Intellect software to send into Axxon Next software information about any received event, including events from integrated ACS, FSA and PSS equipment, as well as devices connected to Intellect software via general-purpose protocols such as BACnet, OPC, SNMP. On site of the Axxon Next software, the received information is transformed into captions and overlaid on the video image. Thus, a simple mechanism of integration between ACS, FSA and PSS systems and Axxon Next software is implemented.

New Biometric Access Control System integration

- Nitgen.

New Perimeter Intrusion Detection system integration

- FFT.

Improvements

Access Control Systems

- Honeywell Galaxy Dimensions;
- Castle (Sphinx).

Software module

- Virtual Access Server.

Fixes

Software modules

- Time and Attendance module;
- Visitor Management System;
- Event Manager;
- T&A reports in Intellect Web Report System.

Biometric Access Control Systems

- BioSmart;
- Suprema.

Fire Alarm Systems

- Detectomat.

Perimeter Security Systems

- Forteza.

Control Readers

- HID Omnikey.

Discontinuation

Starting from ACFA 6.0, the following systems are no longer supported:

- Intrepid I.

Documentation and localization

- Localization packages have been improved and supplemented.
- Improvements to documentation have been made as well.

Release features

Version 6.0 of ACFA integration modules includes all new integrations and fixes for the previous version.

For information about compatibility of ACFA 6.0 with Intellect versions, refer [here](#).
