

Soyal integration module

The Soyal integration module allows sharing information about events and alarms between the Soyal access control system and the Intellect PSIM for creating a unified integrated security platform powered by AxxonSoft software.

The Soyal integration module supports the following functions:

- Configuration of Soyal hardware
- Monitoring and management of Soyal-based systems

ACFA Intellect features integration for **the AR-716, AR-721, AR-725 and AR-727 controllers.**

The AR-716 is an IP controller capable of managing multiple doors. The device has two ports, each of which supports up to 8 readers.

AR-721, AR-725 and AR-727 readers can retain event logs for up to 10 years. The AR-727 has a backlighted touchscreen.

Here are just some of functionalities integrated:

- Site code Error, PIN code error
- Read and enter
- Alarm event
- last enter/exit time, Enter/ exit monitor
- Key Pad Locked
- Invalid Card
- Expire date

These events may trigger a range of response scenarios:

- Get time, Synchronize time
- Reboot device
- Among, Disarming
- Open door, Close door
- Alarm on, Alarm off
